# FLORA'S CHOICE

---

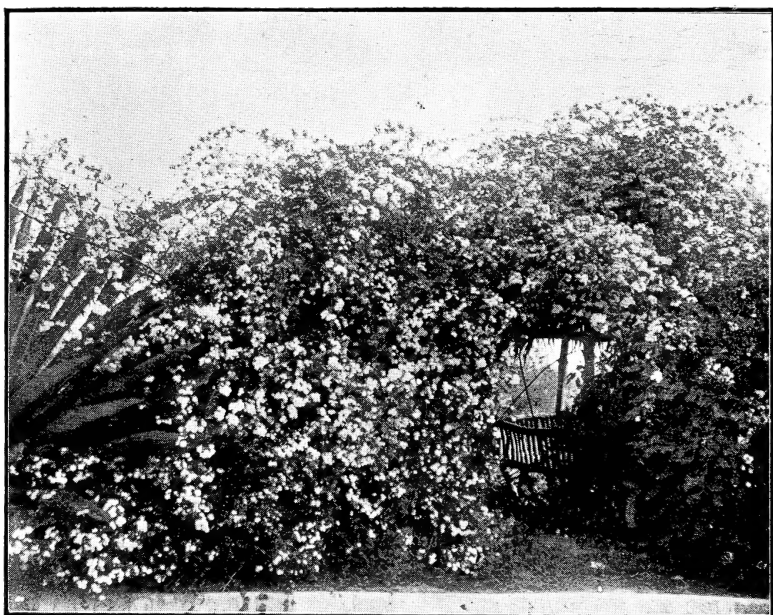

"When Flora from her azure home,  
Came gently down to grace the Earth,  
She called around her every sprite  
To which the sunny air gives birth,  
And bade them search each distant realm  
Of tropic heat or temperate clime,  
From cold New England's rocky hills  
To Santa Crusian groves of lime,  
And bring each flower rich and rare,  
For her to choose her favorite there.

But not the richest tropic blooms,  
Cull'd from the fairest climes on Earth,  
Could vie with nature's fairest flower,  
Or Iran's sun-clad soil the birth;  
Though clothed in rich and gorgeous hues,  
They bore no charm of fragrance there,  
In form and color, sweetness, grace—  
None with the Rose could once compare;  
She bore the palm in Flora's eyes,  
Who to the Rose adjudged the prize."

# CLIMBING PAPA GONTIER

This magnificent variety is a "Native Sport" from the old favorite bush Papa Gontier with characteristic and-climate vigor and productivity. It has the same splendid cherry red flowers, beautifully shaped buds, long stems, and in addition has a strong climbing habit of growth.

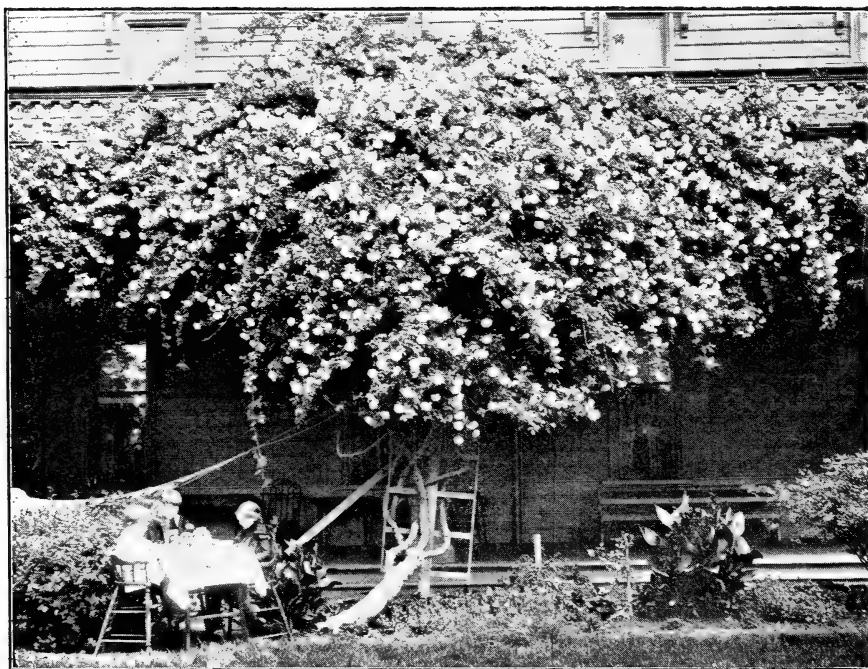

It is destined to be very popular in all localities where the bush variety does well and we are glad to offer it for the first time.

 { XX—Order in multiples of ten.  
 No. 1—Order in multiples of ten.  
 No. 2—Order in multiples of twenty-five.

Prices F. O. B. Riverside, California. All bills due 60 days from date.

Orders from unknown correspondents must be accompanied by cash or satisfactory reference. All bills due June 1.

We can use checks without extra charge for exchange. Our bank credits full amount.

Sales made subject to stock being unsold when order is received or loss by any and all unavoidable causes.

Boxes charged at minimum rates. All shipments carefully packed in moss.

We exercise the greatest care to keep our varieties true to name, and hold ourselves in readiness at all times to replace, on proper proof, all stock that may prove otherwise; but it is mutually agreed between the purchaser and ourselves that we shall not, at any time, be liable for any amount greater than the original price of the stock.

Stock can usually be handled by Christmas time. We can dig only one variety at a time for all aggregate orders to enable us to handle the output while dormant, therefore it is impossible to ship full assortments early in the digging season. When Pacific Coast orders are filled (about February 1st.) all the unsold stock we have is shipped to St. Louis.

Our trade being wholesale only, we beg our friends not to hand our prices to parties not entitled to them.

## GRADES

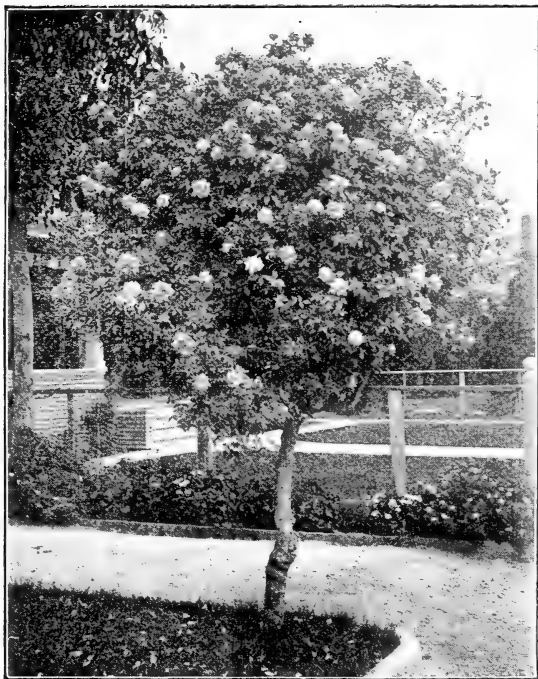

**XX.**—Very stocky and strong, heavily rooted. Are cut to 30 inches of wood when packed.

**No. 1.**—Hybrid Perpetuals and Climbers graded 24 to 30 inches of wood. Teas, Hybrid Teas, etc., graded 18 to 24 inches of wood. All plants stocky, well rooted, with three or more branches. Are cut to 24 inches of wood when packed.

**No. 2.**—Hybrid Perpetuals and Climbers graded 18 to 24 inches of wood. Teas, Hybrid Teas, etc., graded 12 to 18 inches of wood. All plants stocky, well rooted, with three or more branches. Are cut to 18 inches of wood when packed.

All No. 2's are extra fine for transplanting to nursery rows; a portion of them are heavy enough for retail use with many nurserymen.

Wm. A. Richardson, Marechal Neil, Reve'd Or, Cherokee, Sofrano, Perle, Sunset, La France, Duchess of Albany, Marshall P. Wilder, and Gen. Washington are not as robust growers as other sorts and we are obliged to grade them a little lighter.

Mme. Lambard as a Standard

Adhesion of Mastica is great---it's  
a sticker. Per gallon \$1.25.

Admiral Dewey

Yellow Banksia and Lamarque

Miss Session of San  
Diego, writing about Mas-  
tica, says:

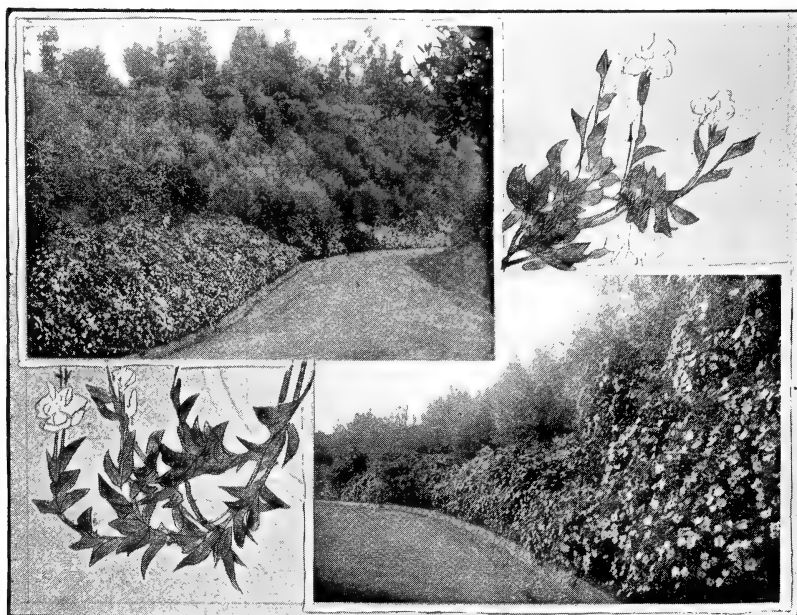

"It certainly does work  
nicely.

The Gleaner

*J. Horace McFarland Company*

*Mount Pleasant Press*

*Harrisburg, Pennsylvania*

June 10, 1905

Dear Mr. Chase:

I was just about to write you as to the curious behaviour of those Kaiserin Augusta roses you sent me some weeks ago. When they came they looked rather doubtful to me, inasmuch as they were so very dormant, but yet unshrivelled. I trimmed them off short and planted thirty in one bed. They did not make a move for about three weeks, but if you want to see anything moving you should take a look at these roses now. Of the thirty all have lived, only one showing a little reluctance to break. The largest growth of any of them from the shoot where the break occurred was  $22\frac{3}{4}$  inches, today. This is one and three-fourths inches in two days on that one particular rose. There are many others close to it and the whole bed is a sight because of its vigor and push. It is also full of buds, and I am afraid that the first rose is going to come open while I am at West Baden, which is all wrong.

Yours truly,

*J. Horace McFarland.*
